

HONEYWELL LED SEARCHLIGHT

Honeywell

 ALL CLEAR

Honeywell's LED family of searchlights offers solutions for military and commercial helicopters worldwide.

Honeywell Aerospace is a worldwide leader in design, supply and support of exterior aircraft lighting systems. Honeywell's unparalleled LED experience includes over 20 years of LED experience on exteriors of aircraft and over three billion flight hours. Honeywell has the experience and capability to design and deliver LED exterior lighting that meets real-world requirements through moisture protection, thermal management, power quality, optical design and control.

BENEFITS

Improved pilot visibility at reduced lifecycle cost:

- Photometric Life of 50,000 Hrs. – 100x over Halogen
- Increased IR performance: 10x standard dual mode
- Reduced power: 400W to 60W Visible 200W to 40W IR
- LED output and color improves pilot visual acuity:

Intensity:

- 175,000 cd Visible / 100 NRI IR
- Dimmable
- 11° x 11° Beam Width
- Uniform light pattern in visible and infrared.

- Weight neutral or decrease (variant dependent)
- Proven mechanical actuators

LOWEST COST TO RETROFIT YOUR FLEET

- LED Retrofit kit provides significant savings at less than half the cost of a new searchlight
- Plug and Play – change out the lighting canopy and keep the actuator
- Full LED assemblies available in Dual Mode (Visible and Infrared), Visible Only, or Infrared Only Configurations
- No aircraft wiring changes
- Available in Immersion Rated, MIL-STD-464 EMI hardened and qualified

COST SAVINGS

LED Retrofit kit provides significant savings at less than half the cost of a new searchlight

PLUG & PLAY

Change out the lighting canopy and keep the actuator

DUAL MODE

Available in Dual Mode (Visible and Infrared), Visible Only, or Infrared Only Configurations

EASY INSTALLATION

No aircraft wiring changes

RUGGEDIZED

Available in Immersion Rate, MIL-STD-464 EMI hardened and qualified

CONFIGURATIONS

Harsh Environment - Immersion and MIL-STD-464 EMI Qualified Versions Available

IR Only High Intensity Replaces Halogen with Black Glass Filter – 250 NRI, 15° Circular Beam Spread

Visible Mode Only
